Section C: SERVICE LEVELS

38 General Principles of Service Level Agreements

The Service Level agreements have been logically segregated in the following categories:

38.1. Service Level Agreement

- a. Service Level Agreement (SLA) shall become the part of contract between RSCCL and the successful bidder. SLA defines the terms of the successful bidder's responsibility in ensuring the timely delivery of the deliverables and the correctness of the same based on the agreed Performance Indicators as detailed in this section.
- b. The successful bidder has to comply with service level requirements to ensure adherence to project timelines, quality and availability of services, throughout the period of this contract i.e. for a period of five (5) years including implementation phase. The successful bidder has to supply appropriate software/hardware/automated tools as may be required to monitor and submit reports of all the SLAs mentioned in this section.
- c. For purposes of the SLA, the definitions and terms as specified in the document along with the following terms shall have the meanings set forth below:

- "Total Time" - Total number of hours in the quarter (or the concerned period) being considered for evaluation of SLA performance.
- "Uptime" - Time period for which the specified services/outcomes are available in the period being considered for evaluation of SLA.

Formula for calculation of Uptime:
$$\text{Uptime (\%)} = \{1 - [(\text{Downtime}) / (\text{Total time} - \text{scheduled maintenance time})]\} * 100$$

- "Downtime"- Time period for which the specified services/components/outcomes are not available in the concerned period, being considered for evaluation of SLA, which would exclude downtime owing to Force Majeure & Reasons beyond control of the MSI.
- "Scheduled Maintenance Time" - Time period for which the specified services/components with specified technical and service standards are not available due to scheduled maintenance activity. The MSI is required to take at least 10 days prior approval from RSCCL for any such activity. The scheduled maintenance should be carried out during non- peak hours (like post mid-night, and should not be for more than 4 hours. Such planned downtime would be granted max 4 times a year.
- "Incident" - Any event/abnormalities in the service being rendered, that may lead to disruption in normal operations and services to the end user.
- "Response Time" - Time elapsed from the moment an incident is reported in the Helpdesk over phone or by any applicable mode of communication, to the time when a resource is assigned for the resolution of the same.
- "Resolution Time" - Time elapsed from the moment incident is reported to Helpdesk either in person or automatically through system, to the time by

Selection of Master System Integrator (MSI) for Implementation of Command Control and Communication Centre (C4) under Smart City Mission in Ranchi (3rd Call)

which the incident is resolved completely and services as promised are restored.

38.2. Measurement of SLA

The SLA metrics provided specifies performance parameters as baseline performance, lower performance and breach. All SLA calculations will be done on quarterly basis. The SLA also specifies the liquidated damages for lower performance and breach conditions.

Payment to the SI is linked to the compliance with the SLA metrics. The matrix specifies three levels of performance, namely,

- The MSI will get 100% of the Contracted value if all the baseline performance metrics are compiled and the cumulative credit points are 100
- The MSI will get lesser payment in case of the lower performance. (For e.g. if SLA point score is 80 then the MSI will get 20% less on the quarterly payment
- The formula calculating the deductions is “(100 – SLA Point Score)%”
- If the performance of the Agency in respect of any parameter falls below the prescribed lower performance limit, debit points are imposed for the breach.

The credit (+) points earned during the quarter will be considered for computing penalty.

The aforementioned SLA parameters shall be measured as per the individual SLA parameter requirements and measurement methods, through appropriate SLA Measurement tools to be provided by the SI and approved and audited by RSCCL or its appointed Consultant for accuracy and reliability.

RSCCL shall also have the right to conduct, either itself or through any other agency as it may deem fit, an audit / revision of the SLA parameters. The SLAs defined, shall be reviewed by RSCCL on an annual basis after consulting the SI, Project Management Consultants and other experts. All the changes would be made by RSCCL after consultation with the SI and might include some corrections to reduce undue relaxation in Service levels or some corrections to avoid unrealistic imposition of liquidated damages, which are noticed after project has gone live.

Total liquidated damages to be levied on the SI shall be capped at 10% of the total contract value. However, RSCCL would have right to invoke termination of the contract in case the overall liquidated damages equals 10% of total contract value. Liquidated damages to be levied during Post Implementation period shall be capped at 10% of the OPEX value. RSCCL would also have right to invoke termination of contract in case cumulative debit point (breach points) are above 30 in 2 consecutive quarters.

38.3. Implementation SLAs

38.3.1. These SLAs shall be used to evaluate the timelines for completion of

Selection of Master System Integrator (MSI) for Implementation of Command Control and Communication Centre (C4) under Smart City Mission in Ranchi (3rd Call)

deliverables that are listed in the RFP Volume II.

38.3.2. The MSI has to mobilize the team for commencement of work within 14 days from date of signing of Contract. In case of non-deployment of proposed resources, a penalty of INR 40,000/- per resource /per week will be imposed.

38.3.3. These SLAs for completion of individual milestones listed in the implementation schedule of the RFP Volume II. For delay of every week in completion & submission of the deliverable mentioned in the RFP, the MSI would be charged with a penalty as follows:

| Delay (Weeks) | Penalty % on the respective Payment milestone value |
|----------------------|--|
| 1 | 1% |
| 2 | 2% |
| 3 | 3% |
| 4 | 4% |
| 5 | 5% |
| 6 | 6% |
| 7 | 7% |
| 8 | 8% |
| 9 | 9% |
| 10 | 10% |

38.3.4 The Penalty to be deducted on project milestone will be waived off/refunded in case Project Go live within defined timeline as per the final agreement.

38.3.5. The upper limit of penalty would be capped at 10% of the respective Payment Milestone value. In case the MSI reaches 10% of the respective Payment Milestone value in the form of penalty at any point of time during implementation phase, RSCCL reserves the right to invoke the termination clause.

38.3.6. Delay of every week would also account in increase of additional 2 weeks in the maintenance period which will be over and above the maintenance period of 5 (Five) years. This duration would be accounted without incurring any charges to RSCCL.

38.4. Post-Implementation SLAs

- a. These SLAs shall be used to evaluate the performance of the services on monthly basis.
- b. Penalty levied for non- performance as per SLA requirements shall be deducted through subsequent payments due from RSCCL or through the deductions from

Selection of Master System Integrator (MSI) for Implementation of Command Control and Communication Centre (C4) under Smart City Mission in Ranchi (3rd Call)

the Performance Bank Guarantee.

- c. The SLA parameters shall be measured for each of the sub systems' SLA parameter requirements and measurement methods, through appropriate SLA Measurement tools. All such required tools should be provided by the MSI. RSCCL will have RSCCL to audit these tools for accuracy and reliability.
- d. The upper limit of penalty would be capped at 10% of the OPEX value for each quarter. In case the calculated penalty crosses 10% penalty of the OPEX value in 2 subsequent quarters, RSCCL reserves the right to unconditionally invoke the termination clause.
- e. SLAs for street IT infrastructure such as intelligent traffic signal aspects, traffic signal controllers, traffics sensors, surveillance cameras, RLVD cameras, SVD systems, ANPR cameras, emergency call box, public address system, and variable message sign boards.

| # | Uptime SLA (Monthly) | Penalty Clause |

| 1 | Uptime >= 98% | No Deduction |
